

**PRESS RELEASE**

March 16<sup>th</sup> 2026

**Aurora Managed Services acquisition of Ethos MPS business**

**LONDON, 16<sup>th</sup> March 2026: Aurora Managed Services ('Aurora'), today announces the acquisition of the Ethos MPS business assets, staff and contracted customer base.**

The Ethos company was taken into Administration on 3rd March 2026. This acquisition of the MPS business operations by Aurora, agreed with the Joint Administrators, ensures the Ethos customer base will continue to benefit from the MPS services and support they are contracted to, which will now be provided by Aurora.

Robin Stanton-Gleaves, Aurora Chairman said "This is another significant acquisition by Aurora as we continue to invest and grow our managed services business. It is also a very important development for the many organisations who were contracted MPS customers of Ethos. They can now depend on the Aurora business to continue to deliver the managed services they need for their organisations, as well as benefitting from access to the full portfolio of managed services Aurora can provide."

"In addition, I am pleased to confirm that MPS operational staff formerly employed by Ethos will transfer across and become employees of Aurora with continuous employment, so they will continue to provide support to these customers as part of the Aurora Managed Services team."

Ends.

**About Aurora Managed Services**

Aurora Managed Services provide pro-actively managed workplace technology and support to organisations nationwide, helping them to optimise the performance and productivity of their staff and technology, and become more efficient, agile, secure and sustainable.

Our technical expertise spans all aspects of print and document processes, managed IT services, workflow automation and AI, business telecoms and workplace technology.

One of the UK's leading independent providers of managed services, Aurora creates tailored solutions which combine the best hardware and software from market leading manufacturers with Aurora's pro-active managed service delivery.
